# Endokrine Therapie des metastasierten Mammakarzinoms

## Indikation

Oxford LoE: 1a

GR: A

AGO: ++

**Die endokrin-basierte Therapie ist die erste Therapieoption in der Behandlung des metastasierten hormonrezeptor-positiven (oder -unbekannten) Mammakarzinoms**

- Ausnahme: akute lebensbedrohliche Erkrankung
- Cave: Der HR-Status kann sich im Laufe der Erkrankung verändern. Falls möglich, sollte eine Histologie der neuen Metastase gewonnen werden
