## Therapiealgorithmen

### Präambel:

Die in den Algorithmen dargestellten Therapieoptionen stützen sich auf die aktuellen AGO Empfehlungen, können aber nicht alle evidenzbasierten Therapieschritte abbilden, da Vortherapien, Allgemeinzustand, Komorbiditäten, Patientenwunsch usw. für die tatsächliche Therapieentscheidung mitberücksichtigt werden müssen. Im Einzelfall können auch andere, hier nicht aufgeführte, evidenzbasierte Therapieschritte leitliniengerecht und sinnvoll sein.

In den Algorithmen werden unabhängig vom Zulassungsstatus nur Substanzen berücksichtigt, die in Deutschland zum Zeitpunkt der letzten Aktualisierung des Algorithmus verfügbar waren.
