Discoveries in immuno-oncology (IO) have expanded the horizon of cancer therapy. But there is still much to uncover in how tumors evade the immune system and how we can harness the human body’s cancer-fighting capabilities. Through an alliance between Merck and Pfizer, our combined talent and resources are pioneering the exploration of this innovative approach. Standing together with the physicians and patients who have participated in our clinical studies and trials, we continue to move closer to revealing the full potential of IO therapies in our pursuit for a brighter future.

Dear Colleagues,

It is our pleasure to invite you to this year’s 10th International Charité Mayo Conference in Berlin: “Global Perspectives and Future Directions in Women’s Cancer”.

This special anniversary meeting will feature the hottest topics in gynecological oncology including 12 hours of live surgeries, debates, intensive workshops and the latest breakthroughs with more than 700 participants from all over the world.

This year we are particularly proud to host two special symposia: the IGCS-PARSGO Joint Symposium to discuss practical issues of clinical trials, and the TOC-ENOGT-EUTROC-INTEGRATE Alliance Symposium focusing on translational research.

We are convinced that this extraordinary dialogue between international experts and the participants will significantly impact clinical routine and the future of women’s cancer management.

We would be very pleased to welcome you personally in the German capital.

Sincerely yours,

Prof. Dr. J. Sehouli          Prof. Dr. J.-U. Blohmer

Ovarian and Fallopian Tube Cancer as well as Peritoneal Carcinomatosis are amongst the diseases most difficult to treat worldwide.

Since its foundation in 2010 on the initiative of Prof. Dr. Jalid Sehouli, the German Ovarian Cancer Foundation has been committed to intensive, improved dissemination of information and an increase in the quality of life for patients with ovarian cancer.

Through a variety of activities and events, it has focused on topics relevant to patients, such as treatment options, post-treatment care and complementary possibilities such as art therapy and writing workshops.
